- **Moisture and Chemical Resistant**
- **Cushioned Foam Interior**
- **Convenient Pocket for Document Storage**
- **Numerous Configurations Available**

**ETS-Lindgren's Rugged Case shown with Model 3164-05 Antenna (not included)**

**ETS-Lindgren's Rugged Product Cases** provide a safe way to store and ship delicate equipment. Designed for multiple transportation cycles, these cases are uniquely designed to have uniform wall strength and thick, reinforced corners. Additionally, these cases are moisture and chemical resistant, allowing for safe and secure transport of sensitive electronics.

### FEATURES

#### Shipping and Storage Case

These cases provide a convenient way to secure equipment for shipping or storage. Their rugged construction means no additional internal or external packaging is necessary, when used for the model of equipment in which they were designed for.

#### Rugged Polyethylene Construction

The vacuum-formed polyethylene construction of these cases provide

a protective environment that is durable for years of rugged use.

#### Moisture and Chemical Resistant

These cases provide a tight, secure latched seal which serves as a barrier to external moisture. The exterior of the cases is made of a material that offers protection from moisture and most chemicals.

#### Cushioned Foam Interior

Each case has a dense foam interior that is custom cut to the dimensions of a specific antenna, probe, or other piece of test equipment. Equipment fits snugly and is held securely during transit or storage.

#### Document Storage Pocket

An interior pocket provides easy access and storage of owners manuals, calibration certificates, and important product related documents.

#### Numerous Configurations Available

ETS-Lindgren currently offers cases for the following models:

- 3106B
- 3115
- 3116B
- 3117
- 3160-03 through 3160-10
- 3164-05
- 3164-06
- 3164-08

Other models are being added to the series. Please check our website or contact customer care for additional model availability.

#### STANDARD CONFIGURATION

- Polyethylene Vacuum-Formed Case and Model Specific Foam Interior
