BC-01 Biconical antenna 30 to 200 MHz **Main Features** 30 to 200 MHz frequency range Excellent antenna factor Tripod adapter for easy vertical-horizontal polarization change Individual calibration Robust, rustproof aluminium construction Lightweight

BC-01 is a biconical antenna designed for radiated emissions and immunity testing that can be used in conjunction with any receiver or spectrum analyzer.

Its ideal companion is the EMI Receiver Unit 9030 or 9060, which can be easily mounted on the antenna mast.*

*The direct connection between antenna and PMM receiver eliminates additional sources of uncertainties due to coaxial cable attenuation and scattering. For further information please consult our brochure "Fully CISPR-Compliant Digital EMC/EMI receivers 10 Hz to 18 GHz".
