TECHNOLOGIES

# NEAR Field Probes EMC/EMI Test Probes

NFP H-Field Probe Set designed by Y.I.C. Technologies is designed for measuring near field emissions for EMC/EMI Troubleshooting and Pre-Compliance testing

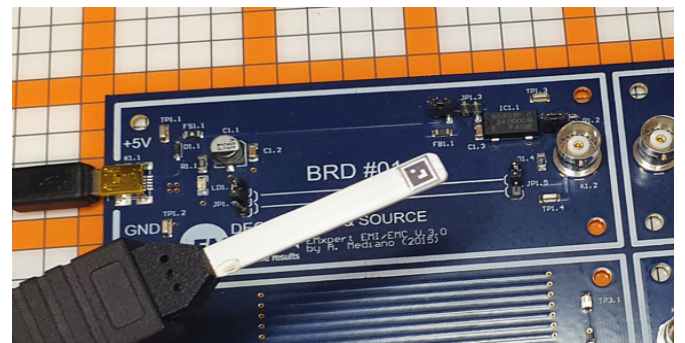

**4 x Probes available per set  
Various frequency probes included**

**Flat response within the range  
of operation**

**Locate, identify, measure, and  
characterize potential source of  
radiation**

**Fully intergrated with EMViewer  
software and robotic arm,  
EMProbe**

**Slim design and protective  
coating with every probe**

**TEST  
ON-SITE**

**RESULTS IN  
SECONDS**

**INCREASED  
EFFICIENCY**

**REDUCED  
DESIGN TIME**

**REDUCED  
COSTS**
